DDA 81-1123
28 MAY 1981

MEMORANDUM FOR: Director, National Intelligence Emergency
Planning Staff

VIA: Chief, Management Staff, DDA

25X1 FROM: [REDACTED] Information Handling Systems Architect, DDA

SUBJECT: Development of a Document: "Architecture of
the Principal Data Bases in the CIA"

REFERENCES: A. Request for Proposal 21-81N

B. "COG Data Base Study," SAI Proposal
dated 3 April 1981 TOP SECRET CODE WORD

1. The development of the subject document involves effort
that is partly duplicative of your new data base study contract,
references A and B. The subject effort is one of several needed
by this office to define the Agency information handling system
as it now exists. The data collection required for your study
covers all the material needed by the subject study, although not
necessarily to the same level of detail.

2. Substantial cost avoidance is available to the Government
by adding the subject effort to your data base contract. In
addition, the documentation requirement of this new task will
assure that the contractor has developed a thorough and accurate
understanding of the existing Agency data base architecture before
proceeding to develop the NIEPS requirements, as you have directed.
Also, the Agency's security is improved by avoidance of duplicative
access to this highly sensitive material.

SUBJECT: Development of a Document: "Architecture of the Principal Data Bases in the CIA"

3. Attached is the Statement of Work for the development of the document "Architecture of the Principal Data Bases in the CIA." My suggestion is that it be a new task in Phase II, following directly on Task 4 of Phase I. Most of the basic data needed for this new task will be collected in Task 4, however, further data collection will probably be required in this additional task in the area of data bases network architecture. Since this document development effort should involve the use of additional contractor personnel, it should support and expedite the already planned effort.

4. For management purposes, the new task should be separately accounted in the contractor's accounting and invoices.

5. The moneys available for this addition to your effort are \$125,000. Form 1716 implementing the transfer is attached.
